## 1. INTRODUCTION

### 1.1 Project Overview

The Lease Management System is a Salesforce-based application designed to streamline the processes associated with leasing real estate properties. It handles tenant management, lease

contracts, payments, and communication with automation features such as flows, approval processes, and email alerts.

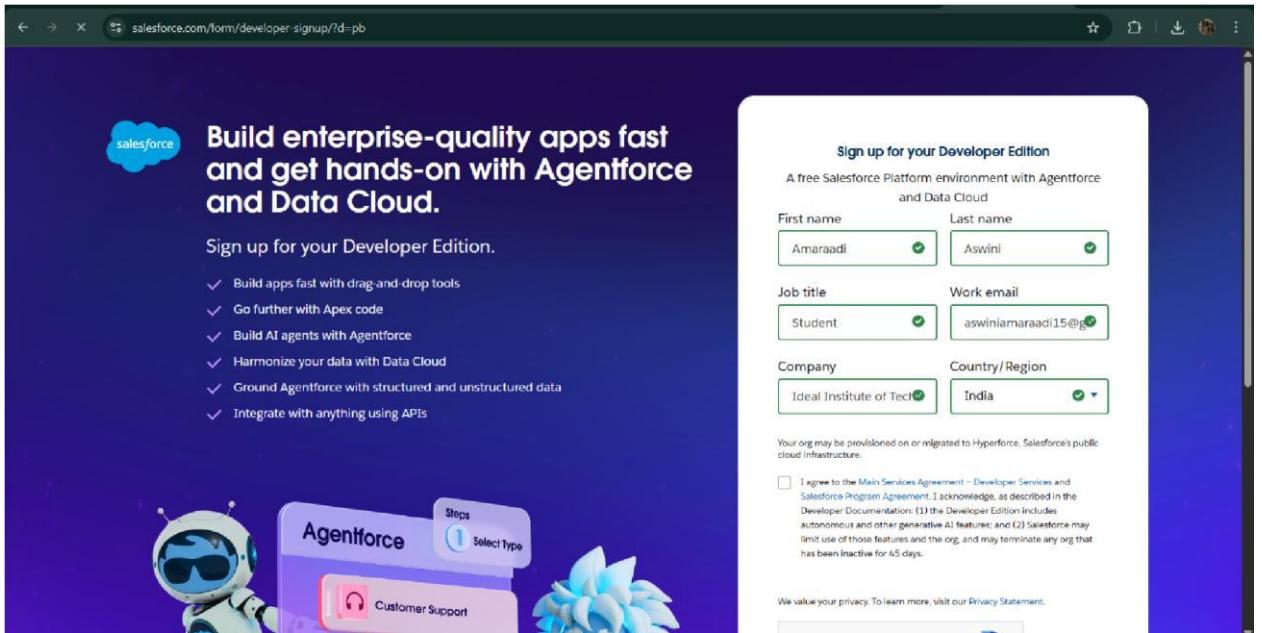

## 1.2 Purpose

The main objective of the project is to enable organizations to efficiently manage properties, tenants, and lease-related activities. It reduces manual intervention, improves accuracy, and ensures better compliance and communication.

The screenshot shows the Salesforce Setup interface under the Object Manager. A sidebar on the left lists various setup categories like Fields & Relationships, Page Layouts, and Record Types. The main pane displays the 'Details' tab for the 'Payment for tenant' object. It includes fields for API Name ('Payment\_for\_tenant\_\_c'), Singular Label ('Payment for tenant'), Plural Label ('Payment'), and several checkboxes for reporting and tracking features. Buttons for Edit and Delete are at the top right.

- Configured fields and relationships

The screenshot shows the Salesforce Setup interface under the Object Manager. The sidebar lists various setup categories. The main pane shows the 'Fields & Relationships' section for the 'property' object. It lists nine fields: Address, Created By, Last Modified By, Name, Owner, property, property Name, sfqt, and Type. Each row includes columns for Field Label, Field Name, Data Type, Controlling Field, and Indexed status. A toolbar at the top of the list view includes Quick Find, New, Deleted Fields, Field Dependencies, and Set History Tracking.

The screenshot shows a Salesforce Lightning interface for a 'Lease Management' application. The main page displays a 'Tenant' record for 'Aswini'. The 'Details' tab is selected, showing fields for Tenant Name (Aswini), Email (aswiniamaraadi15@gmail.com), Phone ((905) 223-5567), Status (Leaving), and Property (Imran). The record was created by 'Sowmya Team' on 6/26/2025 at 6:05 AM and last modified by 'Sowmya Team' on 6/26/2025 at 11:06 PM. A sidebar titled 'Activity' is open, showing a context menu with options like 'New Case', 'New Lead', 'Delete', 'Clone', 'Change Owner', 'Printable View', 'Submit for Approval', and 'Edit Labels'. The 'Upcoming & Overdue' section indicates 'No activities to show.'

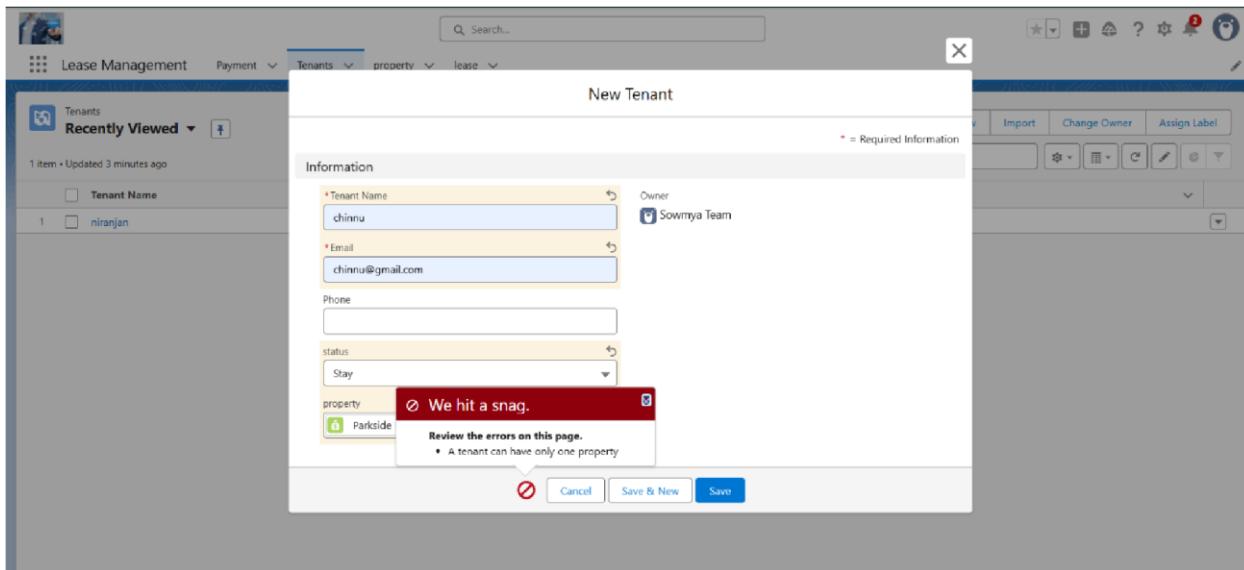

The screenshot shows the same Salesforce Lightning interface after the record has been submitted for approval. A green success message 'Tenant was submitted for approval.' is displayed above the activity sidebar. The rest of the page remains identical to the first screenshot, showing the tenant details and the 'Activity' sidebar.

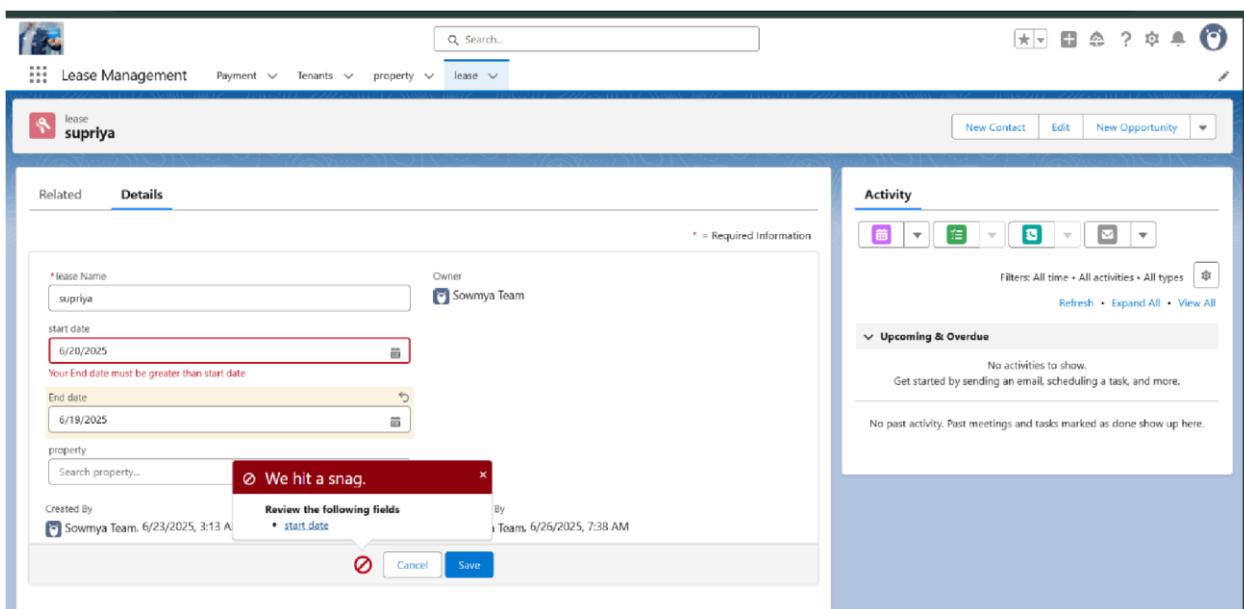

# FUNCTIONAL AND PERFORMANCE TESTING

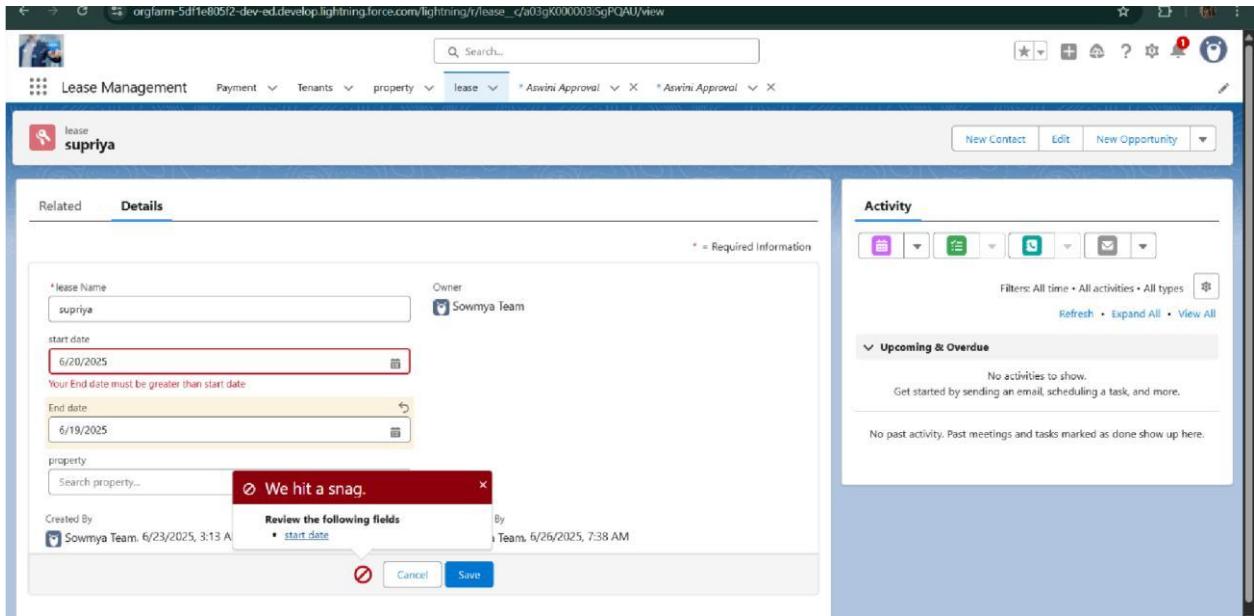

## Performance Testing

- Trigger validation by entering duplicate tenant-property records

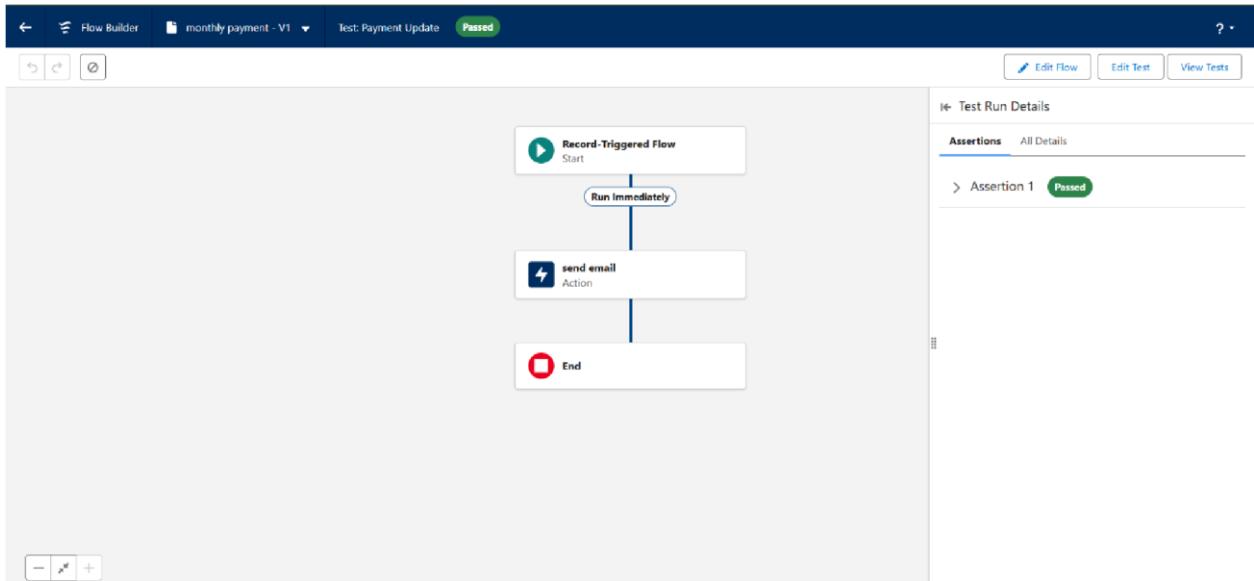

- Validation Rule checking

- Test flows on payment update

- Approval process validated through email alerts and status updates

The screenshot shows a Microsoft Dynamics 365 Lease Management tenant record for "niranjan".
